

FLOCK BOOST

FEEDLOT

DO YOU WANT TO OPTIMISE FEED EFFICIENCY IN INTENSIVE FEEDING SYSTEMS?

Maximise performance with **TPM Flock Boost FEEDLOT**, a specifically formulated all-in-one mineral supplement that optimises uptake of key nutritional components within the animal while maximising the inputs of a supplementary feeding program for finishing stock.

Available in an easy to use loose lick powdered formulation with weather resistant qualities, **TPM Flock Boost FEEDLOT** specifically designed as a high density mineral supplement containing the correct balance of essential salts, macro & micro minerals as well as Vitamins A, D & E.

With the added inclusion of Bovatec® for supporting feed efficiency and weight gain advantages, **TPM Flock Boost FEEDLOT** is available in a powdered loose lick format as a free choice mineral or as an inclusion in feedlot grain based rations maximising the results for your intensive feeding investment.

MAXIMISING RESULTS OF YOUR INTENSIVE FEEDING INVESTMENT

Confinement Feeding or Intensive Feeding programs are implemented either as a strategy to compliment existing farm activities or as a defined feedlot enterprise. Both are intensive systems specifically designed to maximise efficiencies and increase productivity where feed utilization, efficiencies and conversion are pivotal to positive results.

TPM Flock Boost FEEDLOT has been developed based on the successful **TPM Flock Boost** standard blend with the added inclusion of Bovatec® to the high density loose lick mineral supplement. With this key ingredient, **TPM Flock Boost FEEDLOT** assists with not only feed utilisation, feed conversion and feed efficiency when implemented in a consistent balanced diet, but also aides in the control of Coccidiosis in livestock.

Alternative customisations of the **TPM Flock Boost FEEDLOT** range include **TPM Flock Boost BUFFER ASSIST** which has the inclusion of Acid Buf® for improved rumen health and immunity as well as rumen pH modifier.

TPM Flock Boost FEEDLOT or **TPM Flock Boost BUFFER ASSIST** are ideal in any intensive feeding program for finishing stock. However, for further customisations for your farm's geographical and livestock needs, diet formulations and feeding systems based on individual targets and requirements, please contact our **TRAC Productivity Team**.

ESTIMATED CONSUMPTION RATES

- 20-30 grams per day for Mature Stock
- 10-15 grams per day for Weaned Lambs & Young Sheep

In *ad-lib* format, place in well drained tubs in close proximity to a clean water source.

For inclusion in your PPMR/TMR system, please contact your local **TRAC Productivity Consultant**.

STORAGE

Store undercover, away from direct sunlight in a cool dry place.

Available in 25kg bags of 48 per pallet.

Caution: ANIMAL USE ONLY

Does not contain Restricted Animal Material

TECHNICAL ANALYSIS

Calcium (Ca)	15.0%
Phosphorus (P)	4.0%
Magnesium (Mg)	5.0%
Salt (Na Cl)	27.0%
Sulphur (S)	2.2%

CONTAINS BOVATEC®

Also containing Balanced Levels of
Essential Micro Minerals for a Feedlot Program:
Cobalt (Co), Copper (Cu), Iodine (I), Manganese (Mn)
Selenium (Se) & Zinc (Zn)

Vitamins A, D & E included for immune support.
