

FLOCK BOOST

TPM Flock Boost is an all-in-one mineral supplement that optimises uptake of key nutritional components in an easy to use loose lick powdered formulation. Where deficiencies can present challenges throughout the season and impact on overall productivity performance, **TPM Flock Boost** offers real results for a balanced nutritional package providing improved productivity.

Containing the correct balance of essential salts, macro & micro minerals, as well as Vitamins A, D & E, **TPM Flock Boost** has been formulated as a free choice supplement that allows the animal to consume their requirements according to their individual needs.

Specifically formulated with weather resistant qualities making it perfect for an open grazing situation, **TPM Flock Boost** is available in a wide variety of customisations for all classes of sheep, scientifically designed to maximise productivity and performance of feedlot, partial mixed or grass based stock.

CUSTOMISATIONS

TPM Flock Boost products are exclusively designed to geographical conditions and can be customised for individual farm requirements. All **TPM Flock Boost** products include copper (unless otherwise requested). Additional formulations outside the base loose lick mineral supplement include:

- ✓ **TPM Flock Boost LAMBING** - designed to prepare and assist the lambing process
- ✓ **TPM Flock Boost DRY FEED** - for assisting in utilisation of low protein forages
- ✓ **TPM Flock Boost FEEDLOT** - for improved feed efficiency with the added inclusion of **Bovatec®**
- ✓ **TPM Flock Boost BUFFER ASSIST** - a highly effective rumen buffer with the added inclusion of **Acid Buf®**
- ✓ **TPM Flock Boost FEEDLOT with BUFFER ASSIST** - designed for Feedlot Sheep Rations (with **Bovatec®** & **Acid Buf®**)
- ✓ **TPM Flock Boost STAGGERS PREVENTOR** - for improved resistance in grass tetany & ryegrass staggers including **Elitox®**
- ✓ **TPM Flock Boost HOOV HEALTH** - for improved hoof health in challenging environments including **Biotin®**

PRODUCT FUNCTION

MACRO MINERALS

Calcium - For the formation of skeletal tissue providing structural strength and hardness of the bones.

Calcium deficiency leads to reduced milk production and metabolic issues such as milk fever.

Phosphorus - Intimately involved in acid-base buffering systems of blood and essential for fertility and energy metabolism.

Magnesium - Essential for enzyme reactions and nervous system function and for efficient carbohydrate metabolism.

Magnesium is important in the prevention of nervous system disorders such as grass tetany.

Salt - Sodium and chlorine (salt) provide for the proper function of the nervous and muscular systems.

They help regulate body pH and the amount of water retained in the body as well as assists in the excretion of excess potassium in pasture.

MICRO MINERALS

Sulphur - Part of the essential amino acids, methionine and cystine, that make up protein.

Cobalt - Functions as a component of vitamin B12, which is synthesized in the rumen by bacteria.

Copper - Can assist in improving fertility and parasite resistance.

Iodine - Essential mineral for function of the thyroid hormones that regulate energy metabolism.

Manganese - Required for normal reproduction, foetal and udder development.

Selenium - Has antioxidant properties, therefore increasing the animal's immune-competency (disease resistance).

Zinc - Hardens hooves and reduces the risk of skin disease such as photosynthesis.

VITAMINS

Vitamins are closely linked to mineral metabolism and absorption...

Vitamin A - Helps skin and mucous membranes stay healthy.

Vitamin D - Aids in the absorption of calcium and phosphorus from the intestine and their deposition in the bone matrix

Vitamin E - An antioxidant with similar functions as Selenium.

ESTIMATED CONSUMPTION RATES

- 10-15 grams per day for Mature Sheep

Provide *ad-lib* in well drained tubs near clean water source.

STORAGE

Store undercover, away from direct sunlight in a cool dry place.

Available in 25kg bags of 48 per pallet.

Caution: ANIMAL USE ONLY

Does not contain Restricted Animal Material
