

TRACE MINERALS

TPM Trace Minerals is an all-in-one premix mineral supplement that has been specifically formulated for cattle of all ages. Whether used as a calf supplement for correcting mineral imbalances and deficiencies, or as a breeder supplement in preparation for post-partum stresses of calving and overall productivity performance, **TPM Trace Minerals** is a low cost mineral supplement providing real results.

Containing a full complement of micro minerals (cobalt, copper, iodine, manganese, selenium & zinc) with the added benefit of Bovatec[®], **TPM Trace Minerals** has been formulated as a free choice supplement that allows the animal to consume their requirements according to their individual needs.

KEY FEATURES

TPM Trace Minerals is one of the most cost effective mineral supplements on the market due to its low dose rate and concentrated formulation.

The adaptability of the powdered blend allows the supplement to be added to either dry mix rations or a salt lick trough in the paddock. And when used as a part of your stock management program as a follow on from your **TPM Bovine Boost** feeding regime in the wet weather months, **TPM Trace Minerals** provide real value in any cattle grazing system.

PRODUCT FUNCTION

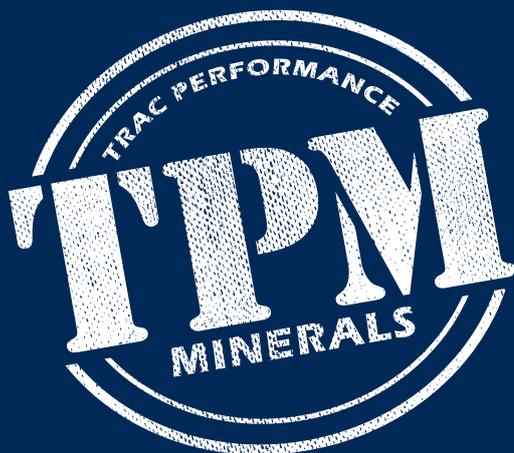

MICRO MINERALS	<p>Cobalt – Functions as a component of vitamin B¹², which is synthesized in the rumen by bacteria.</p> <p>Copper – An important component of many enzyme systems essential for normal growth and development. Copper can assist in improving fertility and parasite resistance.</p> <p>Iodine – Essential mineral for function of the thyroid hormones that regulate energy metabolism.</p> <p>Manganese – Required for normal reproduction, foetal and udder development.</p> <p>Selenium – Has antioxidant properties, therefore increasing the animal's immunocompetence (disease resistance) Selenium has positive effects on White Muscle Disease in newborn calves and Mastitis. Selenium also reduces somatic cell counts and has also been shown to decrease the incidence of retained placentas.</p> <p>Zinc – A component of many enzymes and important for immunity. Zinc also hardens hooves and reduces the risk of skin disease such as photosynthesis.</p>
OTHER ADDITIVES	<p>Bovatec® - A unique feed additive that increases weight gain and feed efficiency when included in supplements for grazing cattle. It is also approved to aid the control of coccidiosis in young stock.</p> <p>Bovatec® regulates rumen microbial metabolism and is a rumen modifier that improves the production of volatile acids in the rumen resulting in improved immune function.</p>

INCLUSION RATE

Stock can eat around 5 grams per head per day and is specifically designed for both breeders and replacement stock.

STORAGE

Store under cover, away from direct sunlight in a cool, dry place. Available in 10kg buckets
